

PPE for Telecom Workers: Hazard ID, Selection, and Use

Level 2 Pretest Evaluation

1. OSHA's Whistleblower Protection Program enforces provisions of more than 20 federal laws that protect employees from being blacklisted, demoted, being denied a promotion or overtime, or a(n)?
 - a. Pay reduction
 - b. Increase in benefits
 - c. Available list of PPE
 - d. All the above

2. Employees can report hazards and violations to OSHA through which medium?
 - a. By phone: 800-321-OSHA (6742)
 - b. By website: osha.gov/workers
 - c. By writing your local office
 - d. All the above

3. These standard(s) are generally produced by private-sector bodies that are available for use by any organization. Commonly referred to as "Industry Standards" or "Consensus Standards"?
 - a. Tower
 - b. Voluntary
 - c. ANSI
 - d. OSHA

4. How often should you refer to the JHA during your daily activity on a communications site?
 - a. Whenever there is a change in the Scope of Work, a new authorized individual accesses the site, or you are returning from an extended break
 - b. When your supervisor calls and asks for an update
 - c. At the time, your supplier calls and asks for an update
 - d. At the end of the shift

5. When working through the Hierarchy of Controls, which method utilizes a change of policy or procedure?
 - a. Elimination
 - b. Personal Protective Equipment
 - c. Administrative Controls
 - d. Engineering Controls

6. Which task below is a common method of an administrative control for energy isolation:
 - a. Lockout/Tagout
 - b. Installing a railing
 - c. Using a crane with a man basket
 - d. Providing an authorization letter

This information was produced under grant number (SH-000003-SH3) from the Occupational Safety and Health Administration, U.S. Department of Labor. It does not necessarily reflect the views or policies of the U.S. Department of Labor, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.

7. When storing PPE after the workday is complete, it is important to ensure that it remains:
 - a. In the original packaging
 - b. Outside the passenger compartment of any vehicle
 - c. Clean and dry
 - d. In a solution of cleanser and water
8. When considering Personal Protective Equipment, fit and comfort are:
 - a. Important if only used to protect the hands
 - b. Not a priority
 - c. Not essential to the functionality of the gear
 - d. Important to ensure proper usage
9. A personal fall arrest system consists of a body harness, a connector, and a(n)?
 - a. Anchorage
 - b. Deceleration Device
 - c. Carabineer
 - d. Rope
10. Carabiners, Snap hooks, and Rings are all considered:
 - a. Anchorage
 - b. Hazards
 - c. Connectors
 - d. Administrative Controls
11. The ANSI (American National Standards Institute) standard for eye and face protection is?
 - a. ANSI Part 4 CFE
 - b. ANSI Z89.1 (Industrial Head Protection)
 - c. ANSI/ASSP A10.48-2023 (Criteria for Safety Practices with the Construction, Demolition, Modification, and Maintenance of Communication Structures).
 - d. ANSI Z87.1 (Current Standard for Safety Glasses)
12. If you are at risk for being exposed to a laser when working with fiber optics, you should wear:
 - a. A face shield
 - b. Tinted sunglasses
 - c. Laser safety glasses
 - d. Double layer welding hood
13. According to ANSI Z89.1 which class of hard hat, or climbing helmet, is required when electrical hazards are present?
 - a. Class C
 - b. Class A
 - c. Class G
 - d. Class E

14. Which of the following type of head protection is **NOT** ANSI approved?
 - a. Full Brim Hard Hat
 - b. Class C Hard Hat
 - c. Class G Hard Hat
 - d. Bump Cap

15. According to OSHA 1910.136 who is responsible for ensuring that each affected employee uses protective footwear when working in areas where there is a danger of foot injuries due to falling or rolling objects, or objects piercing the sole.
 - a. Competent Person
 - b. Employer
 - c. Employee
 - d. Qualified Engineer

16. This standard applies to footwear in the workplace:
 - a. ASTM F2413 (Standard Specification for Performance Requirements for Protective (Safety) Toe Cap Footwear)
 - b. ASTM F2412 (Standard Test Methods for Foot Protection)
 - c. OSHA 1910.136 (Foot Protection)
 - d. All the above

17. This type of glove should be utilized when using a cutting tool such as a razor knife:
 - a. Insulated
 - b. Cut-Resistant
 - c. Impact-Resistant
 - d. Latex

18. ARC Flash clothing is also known as FR, which stands for?
 - a. Free Rotating
 - b. First Responder
 - c. Five Ring
 - d. Flame Resistant

19. RF suits are woven using the following material to help reflect RF Radiation?
 - a. High Density Cotton
 - b. Stainless Steel
 - c. Aluminum Strand
 - d. Polyethylene

20. This Administrative Control can be used to help prevent heat stress:
 - a. Portable Shelters
 - b. Air Conditioning
 - c. Hydration Program
 - d. Reflective Shields

This information was produced under grant number (SH-000003-SH3) from the Occupational Safety and Health Administration, U.S. Department of Labor. It does not necessarily reflect the views or policies of the U.S. Department of Labor, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.

21. The NIOSH recommended exposure limit for hearing protection is:
- 30dB
 - 115dB
 - 140dB
 - 85dB
22. ASRs are a type of respiratory protection that is known as:
- Air-Supply Reducer
 - Atmosphere-Supplying Respirator
 - Angled-Secondary Respirator
 - After-Shock Responder
23. Step bolts according to ANSI/TIA-222-H are designed to support a minimum normal concentrated factored load equal to _____ lbs. applied 2 inches from the inside face of the step bolt head.
- 600
 - 310
 - 300
 - 620
24. The ANSI standard regarding the inspection of climbing facilities prior to use is?
- A10.99-A
 - A10.48-2023 (Criteria for Safety Practices with the Construction, Demolition, Modification, and Maintenance of Communication Structures).
 - A11.11-A
 - A11.58-2023
